

*Conference 01 from Phase A.***CONF. 01**

UNIVERSAL KNOWLEDGE QS AND OBJECTIVES.

To know oneself is to achieve identity with one`s own Divine Being, to know oneself identical with one`s own Spirit, to directly experience the identification between the object of knowledge and the subject who knows. That is what we can and must define as Self-Knowledge.

The fundamental thing in life is to truly come to know oneself: **where do we come from? where are we going to go? what is the purpose of existence?** why do we live? etc. Certainly, knowing oneself is fundamental; everyone thinks they know themselves when they truly do not. So, it is necessary to get **Self-Knowledge**; and this requires incessant Self-Observation; we need to see ourselves as we truly are.

Unfortunately, people easily admit that they have a physical body; they accept that they have it because they can see it, feel it, but their psychological part is so different. Certainly, since they cannot see their psyche, since they cannot touch it or feel it, for them, it is something confusing that they do not understand. When a person begins to observe themselves, it is a clear sign that they intend to change.

Who truly wants to know the "Internal Worlds" of the planet Earth, the solar system, or the galaxy in which we live, first, we must know our intimate world, our particular inner life, our "Internal Worlds". **"Know yourself and you will know the Universe and the Gods."** Each of us has our own Divine Wisdom, which is that of our Real Inner Being.

We know that God is everywhere. But, do **we know our divine part?** We never have time to learn about our inner world. We do not give enough importance to searching for our sacred part, and it is necessary to do this work consciously.

WE ARE ALL MADE UP OF THREE PARTS:

Matter: Our Physical Body or human machine. We have it, but it is not only what we are.

Matter — PHYSICAL BODY — Human Machine

Soul or Mind: The 97% of trapped Essence, the Psychic Energy, which originates all our movements, and which we do not know even though we live much longer in the inner world than in the outer world. Here we find all our different ways of being, our defects.

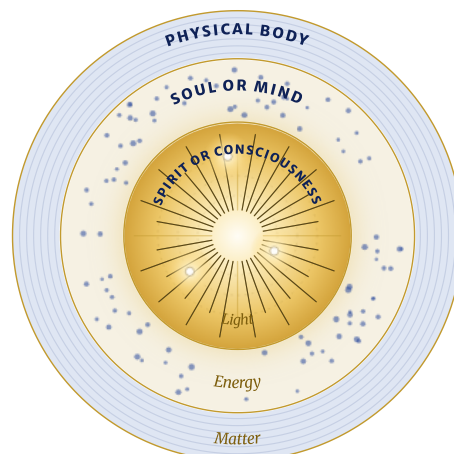

Energy — SOUL OR MIND — Multiple Psyche

Spirit or Consciousness: the 3% of free and conscious Essence, our Divine Wisdom. The Real, the True, the Eternal or Immortal, the Knower of each one, what is not of time and never ends.

Light — SPIRIT OR CONSCIOUSNESS — The real, truly, and Eternal

● 97% of trapped Essence

● 3% of free and conscious Essence

To reach Inner Knowledge, we must study the Four Pillars of Wisdom, which will allow us to slowly penetrate that inner world called oneself.

THE FOUR PILLARS OF WISDOM ARE:

SCIENCE:

Experimentation is the basis of Conscious Science.

Science teaches us the various procedures to understand our inner world and experience it directly. The word "Knowledge" comes from knowing, not believing. Through practice, we can experience directly the different dimensions of nature. **We teach the following practices:**

*Concentration and Relaxation**Astral Projection**Meditation**Past Life Flashback**Karma and Dharma*

***Practice makes the Master, so we
must practice until we succeed.***

ART:

Art teaches us to create. How to create ourselves. In the sexual center, the great possibilities of the human being are latent. The Supra-sex or Superior Sex allows us to create the Superior Existential Bodies of the Being to have representation in the different Dimensions of nature. This is achieved through the sexual union of man and woman, the penetration of the male phallus into the female yoni, without loss of the Sexual Creative Energy.

PSYCHOLOGY:

We have many people living inside us, and we are never identical. Sometimes a petty person manifests in us, and sometimes an irritable person. At any other moment, a splendid, benevolent person; later a scandalous or slanderous person; then a saint; then a liar, etc. Our energy is trapped in each of our defects; we are man-machines, simple puppets handled by invisible strings. We lack a true Individuality; each defect moves in a different direction, and we are never the same.

When we look at the inner world seriously, we are surprised by so many defects. Each of our defects is a different person.

Trapped Consciousness*Released Consciousness*

By eliminating the ego, the Consciousness that it had trapped is released. With the Death of the ego, we recover the Wisdom and Love that were trapped by the psychological defects. In this way, the liberated light sparks are integrated into the free Consciousness.

Method for the Liberation of Consciousness:

1.- Self-Observation all the time for identifying the different defects that manifest to us.

2.- Then we identify the defects, and we must judge the defect until it is understood.

3.- When we understand the defects, they must be eliminated by praying to our particular Divine Mother to eliminate the defect.

With this simple procedure, we can change our way of being, eliminating little detail by little detail. And to release the Consciousness trapped in each of the defects. This process is known as "Death instant by instant."

MYSTIC:

Mystic teaches us to love work, both internal and external. A person begins to know the inner world when they have begun to experiment, to verify the reality of their own particular Being.

In the labor of the Creation of the Bodies as well as in the disintegration of defects and in the Sacrifice for Humanity, it becomes necessary to develop the love of work for work's sake. And this is one of the most difficult things due to the state in which we find ourselves, as previously described.

When we develop the selfless Sacrifice for Humanity, we begin to experience Love for it, we vibrate with the wonderful force of Love, and we experience a very important change in each part of our cells.

Only through practice and direct experimentation can we perfect our capacity to do, which we will call Mystic, because Love without deeds is impossible.

OBJECTIVES OF UNIVERSAL KNOWLEDGE QS.

1. The Self-Realization of the Being.

2. The Regeneration of the human being.

3. Liberation of all our Consciousness.

4. Creation of the superior existential bodies of the Being.

5. Knowledge of all Laws.

6. Knowledge of the Superior Dimensions.

7. To incarnate our individual Christ.

8. To resurrect in oneself.

9. To achieve Sacred Individuality.

Seventy-five practical conferences are given with free admission and completely free of charge, distributed in these four pillars of knowledge, for all those interested. We invite you to attend any of our rooms.

V.M. JESUS OF NAZARETH

—
MASTER JESUS, GIVING THESE
TEACHINGS

V.M BUDDHA GAUTAMA

—
MASTER BUDDHA, GUIDING HIS
DISCIPLES

V.M. SAMAEL AUM WEOR.

—
MASTER SAMAEL, GUIDING TO
HUMANITY.

End of Conference 01.
